EMILY PETRACCO

FRONT END DEVELOPER

INTRODUCTION

Hi there, I'm Emily! I'm a Toronto-based web developer with expertise in creating responsive, accessible, and user-friendly digital experiences. I'm passionate about improving web performance, optimizing UX, and delivering results-driven solutions. My experience in the customer service industry cultivated my ability to directly meet clients' needs while reaching operational targets and deadlines. Embracing a collaborative and continuous mindset allows me to work well with others and enthusiastically seek opportunities to learn more as a developer.

CAREER SUMMARY

WEB DEVELOPER
Vena Solutions | November 2021 - September 2024

- Designed, developed, and maintained web pages for VenaSolutions.com and LifeAtVena.com, ensuring alignment with brand identity and accessibility standards.
- Built responsive, user-friendly web experiences optimized for various devices and screen sizes.
- Delivered high-quality web pages on tight deadlines, leveraging clean, reusable, and efficient HTML, CSS, and JavaScript code.
- Enhanced site functionality and user experience by modifying templates and web applications across the website infrastructure.

SENIOR FLORAL DESIGNER
Sweetpeas Floral Boutique | May 2018 - December 2020

- Worked within a customers budget and vision to put together one of a kind floral arrangements
- Occasionally worked on-site setting up floral displays for weddings and events, both large and small
- Trained new team members on shop and floral arrangement standards, that appropriately represented the brand
- Ensured daily orders went out for delivery, following up with delivery personnel and clients in event of any issues

PROJECTS

COCKTAIL COMPANION *view live* | *view repo*
React

A React based app that helps users find the perfect drink. Users can decide if they wish to randomly generate cocktails or shots at the click of a button. Upon each click, a randomised drink will appear, complete with an image, ingredients list and instructions on how to make it yourself. Data is gathered using the Cocktail Database API.

NOT SO TRIVIAL PURSUIT *view live* | *view repo*
React

A React-based trivia app that utilises the Open Trivia Database API and Firebase. Users can select a category, number of questions and the difficulty of the questions and take a trivia quiz. Unfinished quizzes are saved and can be resumed at a later date.

LOVE CALCULATOR *view live* | *view repo*
jQuery

A fun jQuery app, made just for Valentine's Day! Users can input the names of two people and a random percentage will generate, showing their compatibility.

MAKEUP YOUR MIND *view live* | *view repo*
jQuery | Sass

An app that uses jQuery that helps users find new and exciting makeup products. Users can select what types of products they're looking for and filter out products with specific requirements. The products that match the users specifications are printed to the page with the product name and brand, an image and a link to buy the item. Data is gathered using the Makeup API.
